Directions (Questions 1-10) : Study the passages below to answer the questions that follow each passage.

Passage-I

I was standing on the edge of a bungee platform, peering down from the height of a 22-storey (83 m) building at a sliver of a stream meandering through a deep valley. I could hear the jump master faintly over the strong wind. "Do not look down. Here we go... one, two, three... jump!" The next thing I knew, I was in a free fall, hurtling down, heading straight towards the boulders. The wind drowned out my scream and just when it felt like a never-ending descent, there was a sharp pull at my body harness and my fall was broken. As I swung, suspended head down, I let the gurgling stream and the tranquil hills calm me. I had taken my leap of faith. Back at the platform, loud cheers greeted me, even from those I had met only a few minutes earlier. This is what an adventure trip does – strengthens old bonds, creates new ones and helps you challenge yourself! Considered an extreme adventure sport, it requires you to free fall from a high structure with an elastic cord attached to your ankles. There are just a handful of activities or sports that can match the thrill of walking to the edge of a precipice and throwing yourself to the winds, but it is essential that you bungee jump only with a certified professional who meets all standard safety regulations. Says ex-army captain and managing director of Jumpin Heights in Rishikesh, "The biggest challenge of setting up a bungee jumping platform in India is the apprehension that people have about safety". Where bungee-jumping thrills you with a free fall journey through space spelunking leads you to the mystical expanse within, and sometimes even under terra firma! An adventure sport that can double up as a means of scientific and archaeological research, spelunking can transport you to a world within a world, with prehistoric rock formations, hidden streams and waterfalls, and more. Also known as caving, the sport is relatively new to India. Essential equipment includes nylon ropes, climbing harness, ascenders and descenders, ladder, scaling pole and hard hat/helmet with a chinstrap. Contrary to common perception, spelunking can be fairly low-risk, depending on the cave you choose. It is always best to go caving in a group of three or more and not alone, and people with respiratory and/or orthopaedic issues are advised to avoid the sport altogether. It is important to remember that there are various forms of life in a cave – from spiders and bats to rare plants and fish species – and you must be careful not to hamper their natural habitat during your sojourn. One of the most popular adventure sports in the world, scuba diving is all about discovering a new habitat and giving in to the spirit of wonder. It is important to note, however, that scuba certification involves a lot of classroom work and in-water practice before an actual dive. A basic understanding of the equipment, diving safety, air and air pressure, and the physics of the activity is essential. Once you exit the bubble of basic scuba training, a world of different types of diving opens up to you – your next tryst with the sport could see you diving from a dive boat, shore diving from a sandy beach or even an inland lake. There are fixed entry and exit methods for different kinds of diving too – the giant stride entry, controlled seated entry or backward roll entry for boat diving; surf exit and rocky surface exit for shore diving, and so on.

1. Bungee jumping is considered an 'extreme adventure sport' because
 - (1) it is very thrilling and exciting.
 - (2) one needs to be a fitness freak.
 - (3) there is a lot of apprehension about safety.
 - (4) it involves high degree of risk.

2. Which one of the following is not true of 'spelunking'?
 - (1) The sport can sometimes lead one to underground terrains.
 - (2) It offers a tryst with rocks, streams and waterfalls.
 - (3) It has great scope for scientific and archeological research.
 - (4) Since it is a low-risk sport even people with respiratory issues can indulge in this sport.

3. Which of the following is not a basic requirement for scuba diving?
 - (1) Classroom work and in-water practice.
 - (2) Spirit of wonder to explore and discover new habitats.
 - (3) Diving equipment with map.
 - (4) Physics of diving
4. Which one of the following is true of the narrator's (bungee jumper) 'leap of faith'?
 - (1) He had no fear as he went down.
 - (2) His scream was subdued by the wind.
 - (3) Suspended head down, he could touch the gurgling water.
 - (4) His fall was towards the plain terrain.
5. Which of the following pair of words are nearest in meaning to 'short stay' and 'peaceful', respectively?
(1) Sojourn, tryst (2) Expanse, tranquil (3) Terra firma, calm (4) Sojourn, tranquil

Passage-II

A strange culture of criticism pervades life these days, where everyone is a critic setting-sights on errors and indiscretions, more than on achievements and triumphs. Time was when you waited for that one movie or restaurant review from an established media reviewer. Today, thanks to social media, self-appointed critics deluge you with opinions and ratings. Everyone has a view on where the PM is going wrong and what his next step should be. A minister or godman just has to open his mouth before media pounces and makes it a matter of national debate, involving wilting insults and shattering downers. With eyes trained on indiscretions, we ignore achievements and recognition. We have become a nation that loves having an opinion, preferably negative; and likes nothing better than sharing it. And so, slowly the limelight has shifted from achievement and proud moments to the side of us best kept under wraps. It is indeed a voyeuristic, sadistic generation that takes pleasure in the downfall and public disgrace of others. In a terrible about-turn of the phrase 'no-news-is-good-news', today, we have come to a stage when 'good-news-is-no news'. Media leads the charge, each TV channel watching out for 'Breaking News' moments – mostly censoring or condemning a perceived wrong move, a misdirected word or action, a wardrobe malfunction or the mouthing of a dirty word on the cricket field. People invariably tweet negative stuff, easily adopting moral grandstands, because that is what catches attention. Egged on by a trigger-happy audio-visual media, which shoots down and ridicules public figures for the slightest gaffe, we are stepping into a well-established culture of the Tall Poppy Syndrome! (A social phenomenon where those with more merit or success are disparaged and pulled down). It is all very well for children to pull each other down under the keen pressure of performance, dismissing achievers as 'nerds' and 'losers'. It is even understandable when professionals do so in a dog-eat-dog world, where pulling down one may spell success for another. But when the habit of condemnation and fault-finding becomes a national pastime, we need to sound the danger bells. Children today tune into news channels not for information, but to guffaw at people pulling each other down. This is a veritable street fight delivered to you through television; and viewers love it! The haranguing newsman, delivering cutting sarcasm and debilitating criticism, has replaced the stereotypical fisherwoman. And we all love the vicarious moral grandstanding. The more vitriolic the content, the higher the TRPs a programme delivers. Forgetting to praise the good work done, bosses pounce on little mistakes. Spouses and friends don't hold back judgment; parents lay it on thick. Experience tells us that positive strokes work far better than ridicule, especially public ridicule. Today, we have the power to make and break people through exposés and sting operations. But we also still retain the power to motivate and galvanise the good amongst us. And in order to indulge one, we must not give up the other! When we criticise, let us also stay attuned to the good in those we deride. A senior colleague said to me one day, "Whenever anyone comes to me with a complaint, I insist on first hearing something good about the person they wish to criticize. For, everyone must have some good in them too."

Name of Candidate: _____ Signature of Candidate: _____

Q 1. Read the following passage very carefully and answer the questions given in the last.

- (i) Mahatma Gandhi's ideas about self-sufficiency and handicrafts were directly related to his views on industries and industrial society. Gandhiji believed that industrial societies were based on an endless production of commodities. This produced greed and resulted in competition. The end result of this was violence and war. Even in the twentieth century, Gandhiji argued, it was possible to find large areas in India that were untouched by industries. The future of India and of its civilisation lay in these villages which were governed by simple norms of reciprocity and self-sufficiency. Gandhiji wanted to revive these villages, their craft economy and their practices and make them represent a system that was completely different from Western societies based on industry. His ideas about handicrafts were part of this vision.
- (ii) Gandhiji emphasised the importance of handicrafts, especially spinning and weaving. But he also spoke of other handicrafts which were part of the hereditary occupation of every villager. The development of handicrafts would add to the total resources of the individual and the village and thus enable both to be self-sufficient and self-regulating. For him a world based on non-violence could only be found in places that were untouched by industries. He found Indian villages to be such places since, in his time, he believed, they were still relatively untouched by industries. For him handicrafts were an integral and vital part of his programme to revive villages, to make them self-sufficient and to give back to individuals the dignity to regulate their lives. This is the challenge of Gandhiji's vision that India is yet to meet.
- (iii) Mahatma Gandhi, in the twentieth century, was the single individual who successfully prevented the total eclipse of Indian crafts by relating them to the village economy and the concept of political freedom. He turned the humble spinning wheel into a symbol of defiance by asking people to spin their own cotton at home to weave cloth that was not of British manufacture. It thus became a non-violent and creative weapon of self-reliance and independence.
- (iv) Gandhiji was doing a number of things at the same time. He was reviving a handicraft which had been a vital component of village life. Through the revival of spinning and weaving, people would be able to live better since they would have another source of livelihood. Individuals and villages would become more self-sufficient. At the same time, the even bigger purpose of fighting the bad effects of industrialism would also be met.
- (v) The idea of self-sufficiency was of crucial importance to Gandhiji. An individual, a village, a country could become independent if only it became self-sufficient. Gandhiji described his ideal Indian village in these terms: Each village's first concern will be to grow its own food crops and

cotton for its own cloth. It should have a reserve for its cattle, recreation and playground for adults and children. Then if there is more land available, it could grow useful money crops, thus excluding ganja, tobacco, opium and the like. The village will maintain a village theatre, school and public hall. It will have its own waterworks, ensuring clean water supply. This can be done through controlled wells or tanks. Education will be compulsory upto the final basic course. As far as possible every activity will be conducted on the cooperative basis. (549 words)

- Q 1.1 Write in your own words as to what Gandhiji meant by self-sufficiency? (5 marks)
- Q 1.2 What was the drawback with industrial societies? (5 marks)

Q 2. Make precis of the following passage (Answer should not exceed 150 words) (30 Marks)

Democracy being the basic feature of our constitutional set up, there can be no two opinions that free and fair elections would alone guarantee the growth of a healthy democracy in the country. The 'Fair' denotes equal opportunity to all people. Universal adult suffrage conferred on the citizens of India by the Constitution has made it possible for these millions of individual voters to go to the polls and thus participate in the governance of our country. For democracy to survive, it is essential that the best available men should be chosen as people's representatives for proper governance of the country. This can be best achieved through men of high moral and ethical values, who win the elections on a positive vote. Thus, in a vibrant democracy, the voter must be given an opportunity to choose none of the above (NOTA) button, which will indeed compel the political parties to nominate a sound candidate. This situation palpably tells us the dire need of negative voting. No doubt, the right to vote is a statutory right but it is equally vital to recollect that this statutory right is the essence of

democracy. Without this, democracy will fail to thrive. Therefore, even if the right to vote is statutory, the significance attached with the right is massive. Thus, it is necessary to keep in mind these facets while deciding the issue at hand. Democracy is all about choice. This choice can be better expressed by giving the voters an opportunity to verbalize themselves unreservedly and by imposing least restrictions on their ability to make such a choice. Providing of NOTA button in the EVMs will accelerate the effective political participation in the present state of democratic system and the voters in fact will be empowered. Bringing out this right, to cast negative vote at a time when electioneering is in full swing, will foster the purity of the electoral process and also fulfil one of its objective, namely, wide participation of people. Free and fair election is a basic structure of the Constitution and necessarily includes within its ambit the right of an elector to cast his vote without fear of reprisal, duress or coercion. Protection of elector's identity and affording secrecy is therefore integral to free and fair elections. Giving right to a voter not to vote for any candidate while protecting his right of secrecy is extremely important in a democracy. Such an option gives the voter the right to express his disapproval with the kind of candidates that are being put up by the political parties. When the political parties will realize that a large number of people are expressing their disapproval with the candidates being put up by them, gradually there will be a systemic change and the political parties will be forced to accept the will of the people and field candidates who are known for their integrity.
